

Email Scams To Watch For When Working From Home

YOUR AWARENESS IS THE BEST DEFENSE

Cyber attackers know that targeting you may be the path of least resistance to accomplishing their objectives. They'll often try and trick you by creating a sense of urgency. Be aware of this and carefully review all communications before clicking or responding. Common sense is your friend!

PRO TIPS

- Be aware of email and SMS phishing
- Ignore and delete email from untrusted sources
- Beware of messages with a sense of urgency
- Beware of messages asking for personal info
- Enable "Ask before displaying external images"
- Grammatical errors may indicate danger
- Hone your phishing recognition skills:
